

COST-EFFECTIVE AND SUSTAINABLE: EconX® TRAILER EBS4

The electronic braking system for trailers (TEBS) combines the electronic control unit, sensor technology and pneumatic control in one compact Brake Module. Now it is available as an EconX version of TEBS4 to the Independent Aftermarket.

Knorr-Bremse Trailer EBS4 has been launched in 2002. Since then more than 200.000 units of TEBS4 have been sold to the market. As most of the Trailer are beyond their »best ages« but still have some good and busy years ahead, Knorr-Bremse now offers the ideal solution for the economical repair of trailers with a limited remaining service life: EconX Trailer EBS4. Using EconX products to repair vehicles that are »in their prime« is not only more cost-effective but also sustainable. The manufacturing of EconX products conserves resources, uses significantly less energy than manufacturing comparable service new products and, as a consequence, generates lower emissions.

The use of remanufactured components for the production of an EconX TEBS4 module, for example, results in a reduction of emissions equivalent to 29,2 kg CO₂.

ECONX TEBS4 – NOW AVAILABLE TO THE INDEPENDENT AFTERMARKET

- > Ideal solution for the economical repair of older vehicles
- Sustainable by using remanufactured components
- Genuine remanufactured by the original parts manufacturer

Knorr-Bremse EconX Trailer EBS4

KNORR-BREMSE TEBS4 PRODUCT RANGE

Knorr-Bremse IAM part number	Description
II39782N50	Service New TEBS4
II39782X50 NEW	EconX TEBS4
