

NEW BODY FOR SV14.. LEVELLING VALVES

On vehicles fitted with air suspension, the Levelling Valve ensures that the axle suspension air bags maintain a constant chassis height irrespective of the vehicle load.

The continuous improvement of Knorr-Bremse products lead into a new body for SV14.. -typed Levelling Valves.

New Body with well-known function

- › The new valve body is made from aluminium and its internal parts changed from steel to plastic.
- › This material change has a positive effect on the durability plus the design is more robust.
- › In addition to that the valves' functions, airflow, characteristics as well as connections remained as known so far.

Levelling Valve with new aluminum body

Please note that existing stock can be used up completely.
From now on, please, place your orders on the new part numbers.

Small deviations in the dimensions could cause some additional mounting effort.

PLEASE FIND BELOW THE REPLACED PART NUMBERS AS WELL AS THE NEW NUMBERS.
