

Safety and Bendix® High Performance Drum Brakes – both are Standard at Volvo®.

Bendix® High Performance ES™ (Extended Service) drum brakes will not only keep you in compliance with the Reduced Stopping Distance (RSD) Mandate, they'll provide you with improved lining life over the previous standard.

Engineered to provide superior durability and extended service life, ES brakes can help lower your cost per mile and minimize vehicle downtime.

Volvo® Sales Codes

To optimize performance of Bendix ES Brakes, you may also choose the Bendix® Versajust® Slack Adjuster	
Description	Option Code
Front and Rear Axle	784-026

Bendix® High Performance ES™ (Extended Service) Brakes... lower cost per mile and less vehicle downtime.

- 9% more wearable lining in the same envelope due to single anchor pin design
- E-Coat² virtually eliminates rust jacking
- Heat treated camshafts deliver superior durability
- Bronze camshaft bushings extend service life

Bendix High Performance Friction Resists Fade for Maximum Braking Power

Unlike competitor products, as our friction heats up during the stop, it resists fade to enable shorter stops.

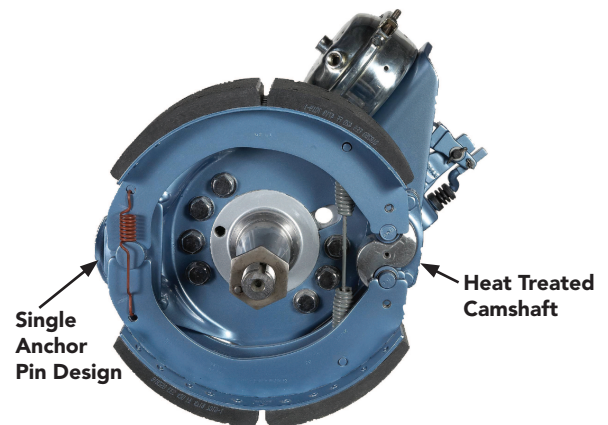

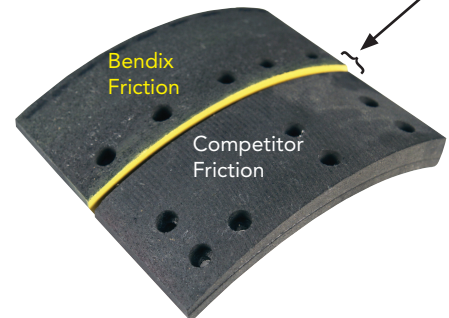

NOW AVAILABLE – Bendix ES Brakes with Versajust® Automatic Slack Adjuster

- Precision adjustment rate delivers minimum running clearance which maintains reserve chamber stroke for safety
- Minimizes risk of over adjustment and hot running brakes
- Extends lining life by as much as 16% and enables longer drum life
- Reduces risk of roadside inspection issues

9%
more wearable lining

Bendix brakes have 9% more wearable lining volume than a leading competitor's brakes.

Virtually eliminates rust jacking

E-Coat²
Shoe
