SEMI-ELECTRONIC AIR PROCESSING UNIT (S-APU) FOR IVECO APPLICATIONS

Knorr-Bremse offers from now on a complete Service Concept for Semi-APU's for Iveco applications

In a Semi APU, an Air Dryer and a Multi-Circuit Protection Valve (MCPV) are combined with two solenoid valves. These solenoid valves can be controlled via the ECU of the commercial vehicle. This allows intelligent regeneration of the Cartridge via smart control of the ECU.

For the customer this function leads to an energy saving compared to conventional air treatment systems, which is a big plus in the current times. Besides the S-APU itself, Knorr-Bremse takes care, that customers can maintain and repair the S-APU cost-effectively. Additionally, Knorr-Bremse offers for every S-APU the Air Dryer and the MCPV as single kit as well as Service Kits for specific maintenance actions.
