

Technical Bulletin

Bulletin No.: PRO-03-33 Effective Date: 4/1/91 Page: 1 of 1

Subject: **MV-2 Control Valve Module Factory Modification and Modification Kit 108513**

This bulletin is to advise that as of February 8, 1991, a product improvement has been incorporated in all new MV-2 valve assemblies and replacement spools. In an effort to ensure that our customers receive this product version when purchasing a replacement MV-2 assembly or spool, Bendix is requesting that your inventory of new (unused) valves or spool assemblies be returned to Bendix as prescribed below. The part numbers affected are as follows:

MV-2 Valve assembly part numbers:

101437	101438	101890	102027	
103904	104449	104863	106115	106989

MV-2 Spool assembly part numbers:

101569	101570
--------	--------

MV-2 valve or spool assemblies that display a date code on the packaging of **B0891H or earlier** should be returned. Those bearing a date code on the packaging later than B0891H already incorporates the improvement and should not be returned. Date codes that appear on the product itself should be disregarded for the purposes of this bulletin. Date codes are interpreted as follows:

First letter = month; A (Jan.), B (Feb), C (Mar), etc. (Letter "I" Excluded/Skipped in sequence)
Next two digits = day of month; 01 through 31
Last two digits = year; 91 (1991); 90 (1990), 89 (1989), etc.
Last letter = plant; H (Huntington)

Contact the service plant that processes your normal orders and obtain a return authorization, prior to returning the above MV-2 assemblies and spools. When contacted, the plant will provide instructions for a no cost return procedure and issue a return authorization number to facilitate tracking the incoming shipment and return of a like number of upgraded product. Bendix will be advising vehicle owners of the availability of the MV-2 control module modification kit, part number 108513. Due to this notification, vehicle owners interested in upgrading their present equipment will be contacting you regarding the purchase of this kit. Kit 108513 is available using your normal ordering procedures and contains the parts and instructions necessary to modify **both spool assemblies in an MV-2.**

Should you have any further questions, please contact your Bendix sales representative.
