Subject: **7/16" Hose & Hose Assemblies Replacement of 1/2" Hose**

Many OE vehicle manufacturers are using 1/2" I.D. hose on 121 vehicles, and a question has been raised concerning replacement of 1/2" I.D. hose with HVSG 7/16" I.D. hose.

This is to advise that HVSG Engineering has approved the replacement of 1/2" I.D. hose with 7/16" I.D. hose and, therefore, substitution may be made without exception.
