

Changes to Park/Shunt Valves

Knorr-Bremse offers reliable products with high quality. The continuous enhancement of our products leads to changes in material or production process and currently to the new Park/Shunt Valves shown below.

Park/Shunt Valves AE4370 and AE4371

The new Park/Shunt Valves change slightly in their visual appearance

(1) Charging Valve

The design of the cover of the charging valve changes to a fixed version.

Please note that this also means that opening and closing pressures are fixed - more precisely by this design change but the overall height is increased by 5 mm which may possibly cause interference on some applications.

(2) Mounting Plate

The mounting plate of the new Park/Shunt Valves has welded nuts, instead of the machined nuts on the old valves.

(3) Main Body

The main body has changed slightly to accept the new charging valve design.

Dimensions and port positions remain unchanged.

| Old design | New design |
|--|---|
|  |  |
| Charging Valve - adjustable | Charging Valve - fixed |
|  |  |
| Mounting Plate - old design | Mounting Plate - new design with folded plate and welded nuts |
|  |  |
| Body - old design | Body - new design |
|  |  |

In the table below please find the old and corresponding new part numbers:

| Product Type | Existing (old) part number | Replacement (new) part number |
|--------------|----------------------------|-------------------------------|
| AE4370 | K025700N00 | K132945N00 |
| AE4371 | K025699N00 | K132946N00 |

Please note that all existing stocks can be used up.
