

Technical Bulletin

Bulletin No: TCH-061-002

Effective Date: 1/29/2013

Cancels: N/A

Page: 1 of 1

Subject: **Approved Service Tool for Bendix™ VORAD® VS-400 Forward Looking Radars**

Bendix Commercial Vehicle Systems is the sole service support provider for Bendix™ VORAD® VS-400 Forward Looking Radars (FLRs), and Driver Interface Units (DIUs). As a result, **only the Bendix® ACom® Diagnostics software (version 6.4 or later) is authorized to be used to service the system.**

Use of any other software — including any previously-used programs, such as the Eaton® Roadranger® software — is no longer permitted, and can potentially result in system malfunction(s). The practice of reprogramming the radar or DIU using non-approved software is NOT permitted by Bendix and any **warranty claims resulting from the use of non-approved programs will NOT be honored.**

Please refer to BW2771, the VORAD® VS-400 Troubleshooting Guide, for detailed technical information and download the latest free Bendix ACom Diagnostics software from the support area of the Bendix website (at www.bendix.com).

For any questions, please contact the Bendix Tech Team at 1-800-AIR-BRAKE, option 2, then 1.
