

UP2DATE

REPLACEMENT OF SELECTED RANGE OF SPRING BRAKE ACTUATORS: OVERVIEW OF NEW PART NUMBERS

Spring Brake Actuators are used to provide the input force to actuate the vehicle's foundation brake and provide the service brake force and the parking brake force.

Knorr-Bremse offers reliable products with high quality. The continuous enhancement of our products leads to changes in material, components or production process.

In the course of a continuous enhancement on a range of actuators with parking portion Type 30 we would like to inform about a change in part numbers (see next page).

At a glance

- › The rear body of the new actuators is slightly shorter (~ 12 mm) compared to the old actuators
- › Fit and function of the new actuators are identical to the old range
- › Please place your future orders on the new part numbers

Spring Brake Actuator from Knorr-Bremse

OVERVIEW OF NEW PART NUMBERS FOR SPRING BRAKE ACTUATORS

Old part number	Old type number	New part number	New type number	Description
K111509N00	BX9455	K153951N00	BX9465	Spring Brake (S-Cam)
