

With the common values of value, safety, and customer service, Bendix and Utility are committed to developing innovative solutions and new technologies to help improve highway safety.

Superior Trailer Solutions To Maximize Performance And Strong Warranty Protection.

Take advantage of superior trailer braking systems and solutions that work best for your customer's application. Talk to your Account Manager, call 1-800-AIR-BRAKE (1-800-247-2725), or visit bendix.com.

BENDIX® TRAILER SOLUTIONS

**Protecting your investment every mile of the way.
 Take advantage of our extended warranty programs with each new order.**

The brake system your customers choose can make the difference between a trailer that makes money and one that sits idle in the service bay. Make sure your customer gets the best...make sure it's Bendix®.

Our complete portfolio of trailer products is designed for performance, reliability, and maximum value and is backed by a powerful warranty.

The First Name In Trailers®

Bendix® trailer products are backed by one of the best warranty plans in the industry.

These Bendix® products are standard on all refrigerated units, flatbeds and dry vans.

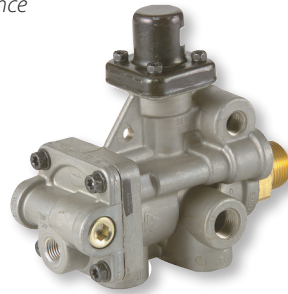

Available Databook Options

Standard

Bendix® SR-5™ Spring Brake Relay Valve

Maintain performance and reliability.

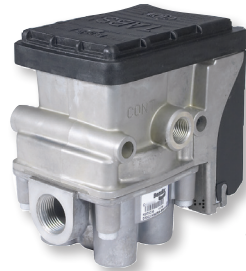

Provides premium performance under extreme conditions. Widely recognized as the leading spring brake valve in the market today, the valve's design offers the fastest release. Push the trailer park brake release button, and the trailer is ready to roll before the driver can shift into gear. The release speed helps prevent dragging tires and additional strain on your tractor's drive train.

5 years/500,000 miles parts and labor.

Bendix® TABS Trailer ABS

Superior braking performance. Compact and modular.

The Bendix® TABS ABS for trailers was chosen to allow Utility an easy upgrade into the next-generation trailer stability system, Bendix® TABS Advanced. Both are built on a reliable single-channel, 2S/1M configuration – the most popular ABS design for today's trailer manufacturers and owners.

• From a two sensor/one modulator, all the way up to a four sensor/three model, TABS offers more system configurations than any other manufacturer.

- Fast and reliable brake timing for all applications.
- Highly comprehensive blink code diagnostics means quicker troubleshooting and less downtime than competitive solutions.
- A nylon control line filter makes TABS twenty times more robust than systems without one against the effects of contamination.

5 years/500,000 miles parts and labor.

Standard

Bendix® Versajust® LS™ Slack Adjuster with the WearMax™ Clutch

Help avoid dragging brakes and lower your TCO.

Are your brakes a drag on your bottom line? Versajust slack lowers the risk of over adjustment and dragging brakes that can lead to premature lining and drum wear seen with many other slacks.

- Reduces risk of dragging brakes.
- Extends brake friction and drum life while reducing fuel costs.
- Improves total cost of ownership (TCO) through improved wear life, fuel savings and reduced risk of CSA violations.

Since no installation templates are necessary, maintenance is hassle-free. Designed for universal fit, Versajust can replace just about any other slack adjuster.

6 years/1,000,000 miles parts, 1 year labor.

Standard

Bendix® EnduraSure® Spring Brakes

Durable performance helps keep operating costs down.

Do you frequently replace spring brakes? Keep operating costs down with a smarter solution – the EnduraSure® Spring Brake series – now with a sealed option – EnduraSure-Pro. Durable performance means fewer replacement parts and less downtime.

EnduraSure® Spring Brake

- Up to 3x the power spring life of competitors and even previous Bendix spring brakes.
- Our No Touch™ Power Spring increases height between coils by 33% vs. typical T30/30 spring brakes to help prevent coil clash and corrosion.

- Epoxy coated power spring enhances corrosion protection.
- Lightest weight chamber in its class.

6 years/1,000,000 miles parts, 1-year labor.

For fleets seeking a long-life option, choose our premium sealed option:

EnduraSure®-Pro

- Up to 5.5x better spring life than competitive non-sealed spring brakes.
- Performs up to 1.5x better in durability testing than the closest competitive sealed spring brake.
- Dust plug with integrated one-way check valve keeps water and contaminants out.
- No drain holes = sealed against corrosion – unlike some “premium” options.

7 years/unlimited miles parts, 2-years labor.

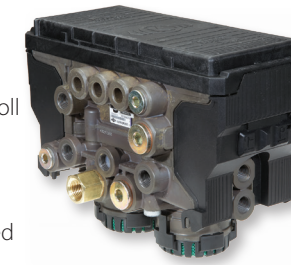

Bendix® TABS Advanced

Simple is better... find out why.

Single- and multi-channel flexibility provides core antilock braking and a trailer roll stability program (TRSP) in one package.

- Able to meet the requirements from two sensor/two modulators through six sensor/three modulators, TABS Advanced automatically intervenes when rollover conditions are detected.
- Rollover mitigation helps reduce rollovers, improve safety, and avoid accident-related costs.
- Works with all trailer types.

5 years/500,000 miles parts and labor.

Bendix® Trailer Remote Diagnostic Unit (TRDU) for ABS

Fast and easy troubleshooting in a pocket-size package.

The industry's smallest and most cost-effective full function ABS diagnostic tool. It offers quick, accurate diagnostics for trailer ABS systems and provides immediate system status, displaying ABS fault information using colored LED lights. No waiting for blink codes. No thumbing through manuals. Just fast and easy troubleshooting.

Bendix® ADB22X®-LT Air Disc Brakes

Lightweight, long lasting.

Now there's even more reason to choose air disc brakes for your trailer application – the Bendix® ADB22X®-LT air disc brake, the first Bendix ADB engineered specifically for trailers. As the lightest weight air disc brake available, the ADB22X-LT delivers increased payload and fuel savings. When it comes to refrigerated units – where weight is a concern – the LT offers exceptional value.

Calculate the impact on your operation:

40 lbs. x 250 trips = 10,000 lbs.

Now multiply that times the number of trailers in your fleet.

- Weight savings – 40# per tandem axle set over our tractor ADB22X.
- Extended service life, lower maintenance costs and downtime.
- A new adjustment mechanism that reduces the risk of brake drag, extending pad life.
- Pads that feature 8% more wearable volume and up to 40% improvement* in wear rate, while meeting the EPA's 2021 Copper-Free Brake Initiative.
- Shares common replacement wear items with Bendix ADB22X on tractor.
- Same 5-year warranty as ADB22X.

5 years/500,000 miles parts – 1 year labor.

Bendix® Versajust® slack adjusters, ADB22X® air disc brakes, and EnduraSure® spring brake actuators are produced and made available by Bendix Commercial Vehicle Systems LLC, a member of Knorr-Bremse.
