# Technical Bulletin

Bendix

Bulletin No: TCH-013-027

Effective Date: Sept. 6, 2016 Cancels: NA

Page: 1 of 2

## subject: Connecting Bendix<sup>®</sup> ACom<sup>®</sup> Diagnostic Software to Bendix<sup>®</sup> TABS-6<sup>™</sup> Trailer ABS Standard and Premium Modules

The Bendix<sup>®</sup> ACom<sup>®</sup> Diagnostic Software package – a free download from bendix.com – is used by technicians to troubleshoot and perform configuration changes on a wide range of Bendix<sup>®</sup> ABS controllers. For the majority of controllers, the latest release of the software – currently version 6.10 – is used.

Bendix<sup>®</sup> TABS-6<sup>™</sup> Standard and Premium modules, however, need to use an earlier version (5.12). That version is automatically installed by the software package on your PC, along with the current version.

Figure 1 - Bendix<sup>®</sup> TABS-6<sup>™</sup> Standard or Premium Module

When an upgrade of the ACom Diagnostic Software is installed, the first time you use the software to connect to a Bendix TABS-6 Standard or Premium controller, follow the instructions below to ensure that version 5.12 of the software is set up correctly for these devices.

1. Start the Bendix ACom Diagnostic Software, select TABS-6 from the list of controllers, and choose "Start in demo mode." *See Figure 2.* 

Bendix	Starter for ACom® Diagnostics 6.10		
ECU	Connection line	Protocol ^	Diagnostic Control
Wingman	CAN	TP20/UDS	Start with ECU
FLC20 SDP	CAN	UDS	0000

2. A dialogue box will be displayed. See Figure 3.

Do you want to switch real mode?	
Yes No	

## Figure 3 - Select Real Mode

Respond "Yes" to switch to "real" mode (from "demo" mode).

3. A Diagnostic Interface Selection dialog box will appear. See Figure 4. Select the RP1210 adapter that you are using from the list and click "OK".
