

GENUINE BENDIX® REMANUFACTURED BA-921® COMPRESSORS FOR DETROIT® ENGINES

Genuine Bendix® remanufactured BA-921® compressors for Detroit® Diesel 2007 EPA & 2010 EPA DD13® & DD15® engines are now available for sale in the commercial vehicle aftermarket.

One of the most popular aftermarket reman compressors on the market, the BA-921 has been standard on DD13 and DD15 engines for over 15 years. And now, fleets looking for a proven product at a lower price, can purchase these from all Bendix authorized dealers and distributors.

Genuine Bendix remanufactured BA-921 compressors:

- Are the only remanufactured compressors that are built by Bendix;
- Use original Bendix components and OE-production processes;
- Come with a standard 24-month warranty (cores are managed as part of the normal core bank); and
- Deliver OE-equivalent performance.

Unlike other remanufacturers, Bendix re-hones the cylinder bore, matches that bore with a new piston and replaces common wear items that competitors typically reuse. When you choose a genuine Bendix remanufactured BA-921 compressor* you can rest-assured you're getting superior performance that will help maximize your uptime and keep your air system clean.

Bendix Reman Compressor	DDC PN	Bendix PN	Core Group
2007 EPA DD13 & DD15	RA4721300815	K095124	1S
2010 EPA DD13 & DD15	RA4711302515	K095125	1T
2010 EPA DD13 & DD15	RA0011307215	K095125	1T

** These BA-921 reman compressor part numbers are supplied without the gear. Bendix recommends using the gear from the replaced unit. Bendix does not currently supply the gear or loose o-rings.*

The only place to get these genuine reman compressors is from Bendix. Get yours today.
