

BENDIX® AD-HF® & AD-HFi® AIR DRYER MAINTENANCE KITS

Combining high-performance with long life, the Bendix® AD-HF® and Bendix® AD-HFi® air dryers feature a cast aluminum body that is rugged, durable, and provides significant protection from corrosion caused by harsh road treatments. And since these air dryers were designed with our customers in mind, the serviceable parts between the two are nearly identical, making maintenance a snap.

Decreased Down Time

By maintaining your AD-HF and AD-HFi air dryers with the Bendix major maintenance kit, the risk of on road failures due to the air dryer will be reduced.

Improved Shop Efficiencies

When it comes time to replace the air dryer cartridge, the service technician will also have easy access to the dryers purge valve, as well as the four pressure protection valves (PPVs). Servicing these parts at the same time as replacing the oil coalescing cartridge adds only minimal time and can provide up to a 60% benefit to the customer. Minutes of preventative maintenance in the shop can help avoid hours (if not days) of unexpected downtime and costly delays on the road.

Peace of Mind

Now, more than ever, with the increased sensitivity of your vehicle's systems, you need clean air to maintain proper functionality. You can rest assured that the Bendix AD-HF and AD-HFi air dryers are working for you, helping to protect against contamination of downstream components.

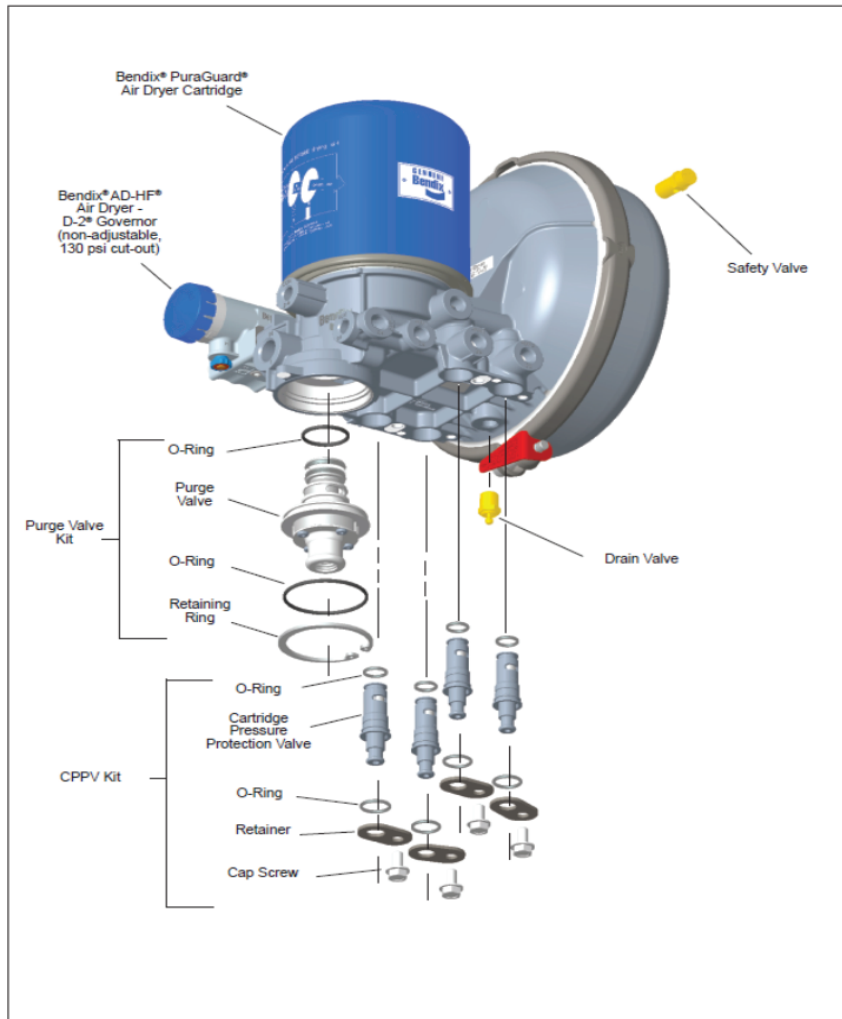

Lower Total Cost of Ownership

Replacing an entire air dryer can be costly, both in time and money. By maintaining your air dryer with the cost effective major maintenance kit, not only do you reduce the risk of downtime in the field but you also benefit from getting more maintenance done during the standard tech service time. Preventative maintenance during one service shop visit will greatly reduce the need to bring the truck back in for air dryer-related service more than once a season.

Bendix® AD-HF® and AD-HFi® Major Maintenance Kits

Part Number	Air Dryer Type	Description
K244460	AD-HF, AD-HFi	Desiccant Cartridge, Purge Valve Kit & CPPV Kit #1 103, #3 112
K244463	AD-HF, AD-HFi	Desiccant Cartridge, Purge Valve Kit & CPPV Kit #3 103, #1 112
K244465	AD-HF, AD-HFi	Desiccant Cartridge, Purge Valve Kit & CPPV Kit #2 103, #2 112

41 mm Oil Coalescing Cartridge

Cartridge Pressure Protection Valve (CPPV) Kit

Purge Valve Kit
