

# Installation Drawing Z035047

For Part Numbers with "-K" suffix

## Explanation:

Knorr-Bremse (Bristol) logistics requirements necessitate the creation of suffixed part numbers in order to clearly differentiate between products that are saleable and identical products that are reserved for use in Equipment Kits. It is normally not possible to create a direct link between the -K suffixed part and the correct drawing. Use the PLM system and follow the logic shown in the example to identify the correct Installation Drawing for a "-K" part.

## Example:

- Part Number: K019342-K
  - Described by Installation Drawing: Z035047,EN,000
  - Made from Part Number: K019342V01N00
    - Described by Installation Drawing: Z027713, 56, 001

For part number K019342-K, see Installation Drawing Z027713, 56, 001

Z035047, EN, 000
