KNORR-BREMSE MULTI CIRCUIT PROTECTION VALVES AE45.. AND AE48..

VISUAL DIFFERENCES BUT SAME FUNCTION

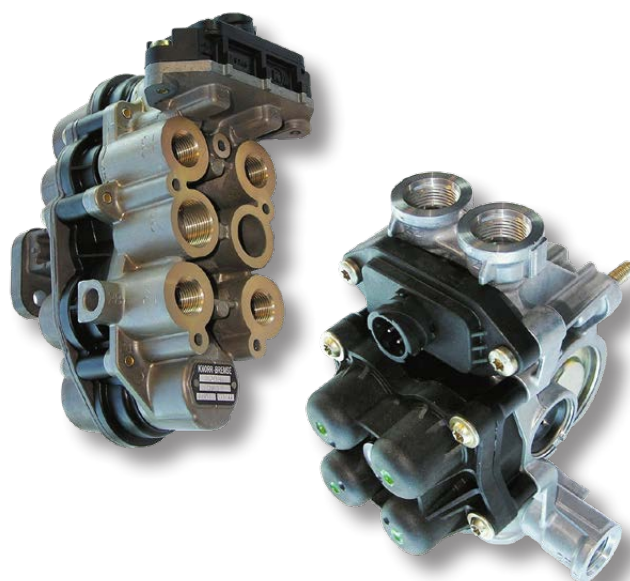

Knorr-Bremse offers AE45.. and AE48.. from Brazilian production plant to increase availability

Knorr-Bremse started their activities in Brazil 35 years ago with brake systems for rail and commercial vehicles. Since 2012 Knorr-Bremse's products are produced in the plant in Itupeva, which set new standards in South America.

Knorr-Bremse Brasil offers AE45.. and AE48.. Multi Circuit Protection Valves for the South American market in the same quality as in Europe. In order to increase the availability of these MCPVs Knorr-Bremse decided to import additional volumes from Brazil. Customers profit from the increased availability without any interference as part number and function will stay the same. There are minor visual differences between the European and the Brazilian valves which will be explained and shown on the following pages.

At a glance

- › No part number change
- › Well-known Knorr-Bremse quality
- › Minor visual differences not concerning form, fit and function

OVERVIEW AE45.. & AE48.. MCPVS

Knorr-Bremse IAM P/N	Knorr-Bremse Type number	Knorr-Bremse OE P/N	OE Manufacturer	OE P/N
