Effective Date: 8/22/75

Page: 1 of 1

Subject: **Pressure Relay Emergency Valves Off-Highway Vehicles**

This is to advise you we have three high pressure relay emergency valves in the field used on off-highway vehicles.

<u>Model</u>	<u>Piece No.</u>	<u>Initial Emergency Application Press.</u>	<u>Max. Emerg. Release Press.</u>	<u>System Pressure</u>
RE-4	279986	75 psi \pm 5	125 psi	145 psi
RE-6	283295	50 psi \pm 5	95 psi	125 psi
RE-6	284280	65 psi \pm 5	110 psi	135 psi

The RE-4 valve is now obsolete and superseded by the RE-6 valve 284280. The regular relay emergency valves cannot be used to replace the above high pressure relay emergency valves.
