

UP2DATE

NEW IAM HAND BRAKE VALVES - FOR DAF APPLICATIONS

The Hand Brake Valve (HBV) is used to control the vehicle's parking/ secondary brake system by gradual reduction of the pressure in the spring portions of the spring brake actuators.

Knorr-Bremse TruckServices is constantly working to improve its product portfolio and service concepts in line with customer and market requirements in order to provide optimum coverage of the various vehicle applications and regional differences. The Hand Brake Valves for DAF were first introduced as original equipment in 2013 and have since been sold more than 295,000 times.

To ensure that customers receive the best possible service on an ongoing basis, Knorr-Bremse also offers Hand Brake Valves in the independent aftermarket (IAM). The valves are available in various versions, equipped with different functions analogous to their original equipment (OE) specification.

At a glance

- › Perfect fit and performance due to original equipment specifications
- › Coverage of all functional designs
- › No compromise on quality

On the following page you will find an overview of the new Knorr-Bremse IAM handbrake valves available for DAF vehicles.

OVERVIEW HAND BRAKE VALVES FOR DAF APPLICATIONS

Knorr-Bremse IAM part number	Knorr-Bremse OE part number	DAF OE part number*	Features**
K215011N50	K050974N02	2122594 2221929 2231929	HBV handle positions: A, B, C
K215012N50	K056486N02	2122600 2208150	HBV handle positions: A, B, C
K215015N50	K062737N02	2122592 2231931	HBV handle positions: A, B
K215014N50	K062735N02	2122591 2231932	HBV handle positions: A, B
K215013N50	K062734N02	2122579 2231943	HBV handle positions: A, B, C
K215016N50	K062738N02	2122581 2231942	HBV handle positions: A, B

*Note: The DAF part numbers should only be used as a reference for the identification of the relevant IAM part numbers. The information is supplied without liability.

** **A** – Drive position, **B** – Parking position, **C** – Test position
