

The Results are in ... and the Numbers Speak for Themselves.

Bendix® SR-5™
Spring Brake
Relay Valve

In comprehensive testing conducted by Bendix Commercial Vehicle Systems LLC, our engineers compared the performance of the Bendix® SR-5™ valve and the new Bendix® SRC-7000™ spring brake valve to valves from leading competitors. The test evaluated overall durability, passable leakage, and valve element breakdown.

Bendix®
SRC-7000™
Spring Brake Valve

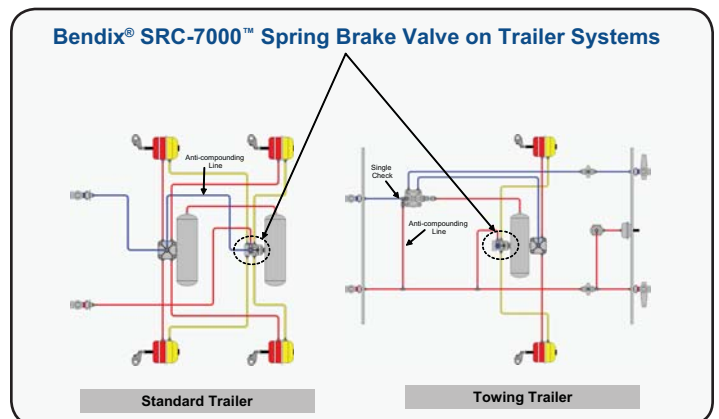

Spring Brake Valves Tested	Durability Test Room Temperature (up to 500K cycles)	Leakage Test Low Temperature (-40 degrees F) (Below 2000 SCCM is permissible)	Accelerated Durability Test High Temperature (220 degrees F) (up to 250K cycles)
✓ Pass ✗ Fail			
Bendix® SR-5™ <i>Our premium model</i>	500K ✓	1213 SCCM ✓	250K ✓
Bendix® SRC-7000™ <i>A new, low-cost option</i>	500K ✓	1200 SCCM ✓	250K ✓
Sealco 500™	142K ✗	3567 SCCM ✗	12K ✗
Sealco 700™	492K ✗	1783 SCCM ✓	250K ✓
Sealco 800™	482K ✗	1100 SCCM ✓	66K ✗
Tramec TEV™	262K ✗	1200 SCCM ✓	96K ✗

Whatever your need and whatever your budget, Bendix has a trailer spring brake valve for you.

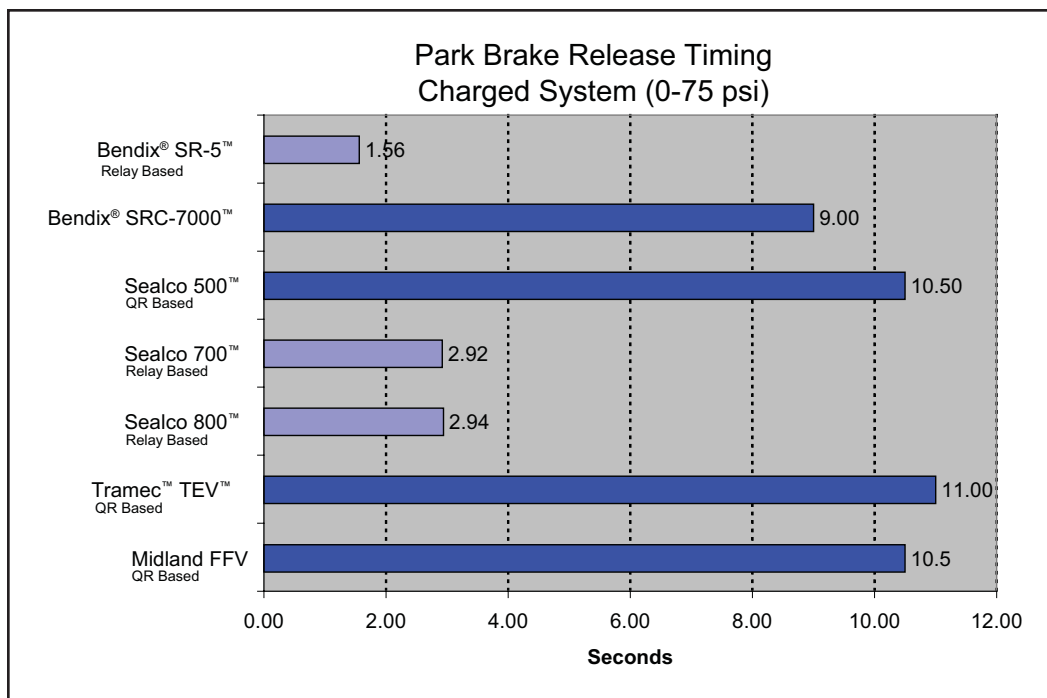

Get Superior Durability and Reliable Performance At An Even More Affordable Price

The Bendix® SRC-7000™ spring brake valve offers you:

- **Low cost** – an economical alternative to our SR-5™ valve model, with the same Bendix durability and performance.
- **No corrosion** – the SRC-7000 valve is constructed from engineering grade plastic composite material tested for extended service life under the harshest conditions.
- **Combats contamination** – our design features oversized internal ports and seals specifically designed to perform through more contaminants than any other valve on the market.
- **Simple design** – the swivel fit mounting tank fitting prevents over-torquing and possible damage during installation.

The Best Keeps Getting Better... The Bendix SR-5™ Spring Brake Relay Valve

The Bendix® SR-5™ spring brake valve gives you a faster start compared to other competitive systems.

The Industry Choice for over 27 years

The Bendix® SR-5™ spring brake relay valve offers you:

- **Rapid Apply and Release** – ensure that parking brakes do not drag at low system pressures.
- **Durability** – the robust relay valve design enables the SR-5™ relay valve to have superior performance in the presence of air line contaminants commonly found in trailer systems.
- **Safety** – with service air loss, the SR-5™ valve prevents automatic application of the spring brakes and allows the application and release of spring brakes, as required, to safely stop and park the vehicle.
- **Anti-compounding** – the SR-5™ valve's anti-compounding feature provides increased robustness and improved failure detection by audibly exhausting air through the tractor protection valve at the back of the cab.
- **Ease of installation** – tank mounted, identical plumbing configuration as competitive valves.

Your air brake system is not the place to cut corners. Rely on precision engineered, quality-built Bendix® Trailer Spring Brake Valves for proven performance every time. For more details, talk to your Bendix Account Manager, call 1-800-AIR-BRAKE, (1-800-247-2725) or visit www.bendix.com today.
