How to View 360° Spin Images on B2Bendix

Navigate to the Product Detail Page (PDP) for the desired Bendix part number. Just below the product image is a 360° icon on this page. Click the icon and a 360° viewer will launch in a new pop-up window. You can navigate within this viewer to see high resolution features of the part number.

The screenshot shows a product page for Bendix part number 800516. On the left, there is a navigation menu with 'PRODUCTS' and 'SERVICE & SUPPORT' tabs, and a breadcrumb trail: 'Home / Products / Valves / Hand Operated Pr'. Below this, the part number '800516' is displayed. A product image of the valve is shown, with a '360°' icon circled in blue. An arrow points from this icon to a 360-degree viewer window. The viewer displays a top-down view of the valve. The valve has a red handle labeled 'TRAILER AIR SUPPLY' and a yellow handle labeled 'PARKING BRAKE'. The control bar at the bottom of the viewer includes icons for Rotate, Pan, Auto-Rotate, Pause-Rotate, Zoom In, Zoom Out, and Full Screen. Labels with arrows point from these icons to their respective functions: Rotate, Pan, Auto-Rotate, Pause-Rotate, Zoom In, Zoom Out, and Full Screen.
