

# CLAMPING SLEEVES FOR WHEEL SPEED SENSORS (WSS)

## Material change of Clamping Sleeve in WSS Kits.

Knorr-Bremse offers reliable products with high quality. Our products are under continuous development in order to keep them "state-of-the-art".

### New Visual Appearance with Benefits

- › The necessity to replace the Clamping Sleeve whenever changing the Wheel Speed Sensor, makes it an inherent part of the Knorr-Bremse Wheel Speed Sensor kits
- › From January 2017, the material of the Clamping Sleeve will be changed from beryllium-copper to stainless steel. Although the design is not changing, the colour of the sleeve will be different (see pictures).
- › With the new sleeve, due to the fact that the clamping forces stay at the same optimal level, the fit as well as the performance of the sensor, e.g. under vibrations, will not be affected. As a benefit the material change improves the corrosion resistance of the sleeve

Please note that existing stocks of Wheel Speed Sensor kits with the beryllium-copper Clamping Sleeve can be used up completely.

Beryllium-copper clamping sleeve (old)

Stainless steel clamping sleeve (new)

EVERY VEHICLE TELLS ITS STORY.
