subject: Bendix® RE-4™ RELAY EMERGENCY VALVE OBSOLESCENCE (UPDATE)

Effective immediately, the Bendix® RE-6® relay emergency valve kit, part number 800098, is obsolete. This part number was the replacement for the Bendix® RE-4™ part number 277446.

The changeover from RE-4 relay emergency valve part number 229434 to the RE-6 relay emergency valve kit part number 800097 remains active. This kit includes an RE-6 relay emergency valve and the reservoir adapter components needed to complete the changeover. Tee fittings are included in 800097 for unusual circumstances (for example, tri-axle trailer applications) where the RE-6 may need six delivery ports. Part number 800097 is only needed in order to reservoir mount the RE-6 or for tri-axle trailer applications.

Obsolete Bendix® RE-4™ Valve Part No.	Bendix® RE-6® Valve Changeover Kit Part No.
